THE "KOSTROMA" AT MANILA.

The Manila Cabtenews of July 4th says: The Russian hospital ship Kogptonia arrived in the bay yesterday morning from Shanghai. When entering the harbour the vessel flew the merchant marine flag at her storn and the red cross ensign at the mainmast.

The object of the vessel's visit is presumed to be to take on board the wounded sailors from the three manners. The cared for at the Canacao hospital, but nothing assaite as regards her mission could be learned, as her captain and chief surgeon could not be seen yesterday.

The Kugptonia is a three masted vessel of about 3 00 tons displacement and a speed of 13 knots. She is commodiously fitted up and the sick wards are up to date in ever particular. She carries nine women nurses, belonging to the Russian red cross society.

The Kogptoma was intercepted by Togo's squadron previous to the fight in the Tsushima straits and taken to the naval base at Sasebo. whence she was allowed to depart to Shanghai many days after the battle of which she saw.

The officers of the ship were busy visiting their comrades on board the interned criusers all day yesterday. [" Kogptoma" is a Manila attempt to imitate the appearance of the name as it looks in Russian.

THE DEPARTURE OF THE JAPA NESE PLENIPOTENTIARY.

The Tokyo correspondent of the N. C. THE ILLICIT OPIUM TRAFFIC.

The Opium Farmer is experiencing great diffi ulty in ondeavouring to prevent this unlawful traffic, which, notwithstanding the activity of the Excise Officers, is apparently increasing. Passengers on the Canton steamers smuggle large quantities down from that city. and if the traffic continues the Opium Farmer will liave no other alternative than to cause a strictor search of passongers to be made, which he is legally entitled to do. The long-robed gentry object to undergoing a search by the excise officers, and frequently complain to the authorities when subjected to it, but nevertheless, it is believed that a great quantity of opium is landed by the well-so-do Chinese. Enropeans also are not now beyond the pale of suspicion, since the conviction of the American who was in league with the Chinese compradore. and if an excise officer has suspicions, Europeans in future must undergo the ordeal

Some ingenious methods to get the luxury into the Colony were revealed before Mr. G. N. Orme at the Police Court yesterday.

A native with a bamboo, on the end of which was a parcel, thrown over his shoulder, alighted from a Canton steamer on Thursday night and was walking clong the wharf when an excise officer stopped him and searched his bundle-Nothing was found in this, but a closer scruting of the bamboo revealed the fact that eix taels of prepared opium was secreted inside. The native informed His Worship that he did not know the laws of the Colony with regard to opium, but as a reminder that he was breaking such laws, he was ordered to pay a fine of \$300, the alternative being three mouths' imprisonment.

In another case in which a steamer passenger was charged, he was found to have eight tiels secreted in a bag, and wrapped up in old paper and clothing. He informed His Worship that he was a letter carrier, but the story wouldn't wash, and he was ordered to pay a fine of \$250 or go to gool for three months.

A third steamer passenger who was arrested was found in possession of fourteen toels, and five mace of opium dross. In default of payment of a fine of \$490, he was sentenced to three months hard labour.

#### A DANGEROUS AND UNLAWEUL CARGO.

The three seamen from tishing junk No. 3,184 who were remanded by Mr. F. A. Hazeland at the Police Court on Thursday when charged with being in possession of gunpowder and cartridges without a permit from the Captain-Superintendent of Police, also with anchoring their boat within 500 yards of other boats while having the said explosives on board, together with dynamite fuses and detonators. again appeared before His Worship yesterday. when a third charge of being in unlawful possession of dynamite fuses and detonators was preferred against them.

TIL Warehip found the first defendant guilty and ordered him to pay a \$100 fine or go to gaol for one month on the first charge, on the second he was fined \$50, the alternative being one mouth's imprisonment, and a fine of \$100, in default one month's imprisonment was inflicted on the third charge. Failing pryment of the fines, the sentences are to be consecutive. The second and third defendants we

Mr. Davies, Manager of the Hongkong Motel, charged Wai Ip, billiard marker, with the embezzlement of \$1.20 before Mr. Hazeland at the Police Court yesterday. The evidence showed that two gentlemen had played five games of billiards, and the defendant had only paid in the amount due on three games. The edefendant was found guilty, but before His Worship passed sentence, Mr. Davies asked him to-day. The send-off given the party was more | not to deal hordly with the marker, as until this occasion he had borne a good character. He also asked that he might not be displayed in the stocks. #### AMUSING RUSSIAN PROPHECIES.

The following comes to light among the documents relating to the origin of the war :-At a conference held at Tsarskoe Selo on 29th December, 1903, Admiral Abasa concurred with Count Lamsdorff that the situation must be cleared up and that Russia must decide her line of conduct. "The Eastern intellect," he continued. "thinks that Russia is afraid of war. because she dres not want war. What will be the result if Russia does not accept the Japanese proposals? War? The Japanese Government must understand that war between Japan and Russia would be very difficult, and the result may put in question the very existence of Japan The Japanese finances are bad. The occupation of Cores with an inimical population would be very costly, and would prove a leech sucking the blood and treasure of Japan for ever, with the result that very soon Japan would be enfeebled and devoured. The Japanese are not merchants. They do not know how to colonize. They are small traders, but not a commercial people versed in the conduct of serious commercial undertakings of an international character. If they occupy Corea they will be our neighbours. and it will be very easy for us to get at them. They will be quite dependent on our will, because they will be enveloped by our forces on three sides. We must break off negotiation and let them ecoupy Corea. Russia will protest and maybe other European Powers will protest. To prevent the slightest risk of war Russia should strengthen her forces in the Far East to the numbers already approved by the lear. In dealing with an Eastern people strength must

be on the spot."

MANILA AS THE TRADE CENTRE OF THE ORIENT

The following observations are taken from the Cubleneus :-

There are serious obstacles to be evercome and these obstacles, strangely enough, are to our thinking made by the Americans them-It is not enough that Manila is, by location,

its spleudid boy, and case of access from so many tropical countries, seemingly destined to be a great city of commerce. Nor is it enough that our people want it to be great and so add to our country's greatness.

As it is now, the trading nations are wary this port. The customs regulations are said be more troublesome and vexations than almost any port in the world. At present the landing of passengers and cargo is difficult expensive and unsatisfactory. This, of course, will be remedied in a few years when the new whorves to built, but even then the very large boats will not be able to enter the thirty fact channel.

The American monufacturers, generally speaking, have made little or no effort to study trade conditions here. They do not try to find out if there is alredy an established market and what its lines are.

The people here have very decided tastes in the things they know about and will not buy imitations or things which are not according to their standards. Many things they have not yet learned to need, but even in these, care must taken to adapt them specially to the tropicsfurniture must be fastened with glue that will withstand moisture and wood that will not swel cotton goods must have fast colours and be of artistic desig s, machinery adapted for use at home with ton or twolve horses must be made much lighter so as to be drawn perhaps by carabao over swampy land.

Lord Timothy Dext r. of Salem, is said to have made a fortune in the old days by shipping warming pans to the West Indies, which the natives utilized for sugar ladles, but the modern merchant need not count en such good luck, for he has all the world in the market sgainst him. and the native of any faraway clime knows what the rest of the world has.

The American packs his goods as if they were to be delivered a block away by messenger Result, they arrive broken and damaged scausing much vexation and less of money to the buyer, and often delaying important public contracts for several months till a duplicate order can arrive.

'f the United States excepts to be the commercial master of the Pacific and the Far East it must do comething besides "hustle." Plain common sense and intelligence are needed. Our country is entering markets where it is not wanted, and competing against other selling nations which have many points of superiority and advantage.

Given common sense and intelligence, a steally, persistent, thorough effort for a few years, and Americans will make Manila the trade centre of the Orient, but it will not be with the present methods.

#### TIENTSIN BUILDINGS.

ton years ahead of our requirements in our new buildings? I was asked by a friend the other day. Look at all those new structures going up along Victoria Road, some of them veritable palaces in comparison to our auto-Boxer architecture, and out of all proportion to our wants, while some may even be considered in the light of white elephants! Well, I answered, it's easy to see that you belong to the conservative element of the community, to the pneumatic brake section of of our social machinery, for the modern spirit of trade and industry does not crystallised spiritof theage, the American nation, we notice that they first build railways from somewhere to nowhere; at the latter point they construct a hotel, electric light and ice plant, and a real estate office Then they commence to make known to the world the marvellous advantages of settlement in Loty Valley, Jericho or some such high sounding hame, and in a couple years' time they have their town settled and furnished with most of the modern improvements; dwelling houses; church, school, drinking saloon, jail and a newspaper, not mention the minor evils of an are-to-date Ard although Tientsin and ossesses most of those advantages of mindern existence, it rightly considers that there is umple room for more of it and les made provision accordingly; for our town will continue to grow till it for outstrips in importance the position it had attained in 1655 when, according to the enthusiastic author of an old work on the subject, it was considered the third town importance of the whole empire, and "clothed in such wealth and splendeur, that her equal could hardly be found in the whole of China. For the present, however, most inhabitants of Tientsin centent themselves with softly whistling "After the war is ever," for the wealth splendour are not obtrusively in evidence, notwithstanding the many new buildings.

COMPANY (LIMITED). The 24th ordinary general meeting was lold on June 9 h at the effices. Cornbill, Mr. W Keswick, M.P., presiding. The chairman stated that the anticipations which were formed at their meeting 12 months ago of a better year than was at that time under consideration had been realized, and the directors had been able to present figures of e, rnings and appropriation of profits which his trusted would be satisfactory: That the steamers had done so well during period of active hostilities between Russia and Japan, with the natural derangement of trade and discouragement to enter upon busines during a period of financial stringency and depression, was a favourable sign of the soundness of the trade apon which their freights depended, and he trusted that when peace was reestablished expansion would occur which would enable the company to continue prosperous. One of their modern steamers, the Hip Sang, while engaged on the peaceful occupation of carrying cargo from Newchwang to Ehanghai, was fired upon and sunk by a Russian torpedo boat destroyer; and he regretted that the directors had also to report the loss of a river steamer, Yuen Wo, by fire, accompanied, unfortunately, with some loss of life to the of Pure China T-a." native passengers. The board, however, had not yet received full details of the last-mentioned disaster. The loss of these steamers had been provided for without recourse to the funds of the company, . The balance to the credit of the underwriting account had been increased through the happy immunity of their ships from serious stoid-uts, and it now stood at had passed without any serious casualties. An the very highest reputation for the side of the revenue account did not call for any particular comment. The company paid less for income-tax owing to the diminished profits for the year 1903. but the charge for interest was greater. Out of the year's profits an appropriation of £10,000 had been made to the reserve account, and a further sum had also been added. to it of £10,000, thus increasing the general reserve fund to £120,000. They had also carried to the exchange reserve nearly £4.000 to meet possible future fluctuations. Their balances in currency tad been converted into sterling at the low rate of Is. 8d. per dollar. They sold last year the Canton and the Rechili and in the early part of this year the El Dorado The prices obtained bad been satisfactory, and in all cases somewhat in excess of the value. The disposal of these old steamers had been judicious, and had assisted the policy of the company in maintaining the floot in a thoroughly efficient and up-to-date condition. By perting with aged vestels the company modernized their fleet and reduced the average age of the steamers composing it. The Kut Sang, one of their new stramers, was now loading at Barry, and would Irave this country in a few days, and two other, steamers were on the stocks, both of which would be delivered this autumn. It would be necessary to increase their tonnage still further. and the directors contemplated the early construction of bests in order, to raplace, those A note writer in the Tientein Times had the which had been lost and sold. He haped that the charcholders would agree with the board that the result of the year's working was satisfactory and would approve the manner in which the profits redized had been disposed of but he was aware that an influential number of shareholders abroad desired that a larger return should be made by means of a bonus. One, therefore, asks that judgment may be withheld and no conclusions drawn until the magisterial inquiry is completed. Mr. Stewart, the compound manager, has been arrested. The

miners' version is as follows:-There had been a wedding and the celebration was kept up late. A difference of opinion on the subject of the Chinese prose between Mr. Stewart and the mines. The former left the room, but reappeared. Shortly afterwards Chinese police were seen patrolling outside, and Mr. Stewart said they had come to protect him. Theo news was brought of a general attack on the miners quarters by Chinese. If it can be proved that Mr. Stewart visited the compound or in any way incited the Chinese his position will be

The Chinese version, on the other hand, is that some coolies were returning to the compound past the boarding-house when they were jerred at and insulfed by miners who were drunk. They made up their minds to retaliate, with the known results.

Mr. Stewart is a Chinese-speaking official, who was specially imported because it was felt that the eighter disturbances are e from misunderstandings between the Chine and mine efficials who were unacquainted with their language. All is now quiet at the mine. with murder.

very serious effect either on America or thing, the outbreak of any disturbance would on the convery have a very serious effect indeed. The Wai Wu Pu having represented his arguments to the Throne we are now glad to learn that the Government has been plas nally instructed by their Majosties to justruct the Board of Education, the Board of Commerce and all the Viceroys and Governors that they must caution the studen s, merchants and all classes of the people against taking any steps to oppose the American Exclusion Luw, as the master must be left entirely to "the Government which will take all possible steps to safeguard Chinese interests.

This is a very proper course to have adopted; and we congratulate Mr. Fockhill on his representations having been so well met. Let us hope that now an expression of such a definite nature has emanated from the Throne, there will be an end of this entirely misplaced zeal on the part of the more emotional section of Chinese. #### THE REST CURE AT LORD'S.

The Daily Mail of June 16th had the following "editorial." At Lord's yesterday a large proportion of a crowd of 30,000 persons is creaibly reported to have fallen asleep owing to the dulness of the game.

This sort of experience was not unfamiliar twenty years ago, when stone-wallers were far more common than they are to-day, and when Hall, for Yorkshire, and Barlow, for Lancashire, could while away a solid hour without obtaining a solitary ran. But in these days crowds were smaller and their expectations more modest. It is true that the financial decadence of that famous county, Nottinghamshire, was ascribed some years ago to the tediousness of the game which the Notts men played; but in those times the rest cure was herdly in fashion, and the peculiar merits of cricket from this standpoint had not even been considered. Yesterday, for over after over the Australian bowlers sent down balls wide of the wicket, and for over after over the batamen refused to be tempted. It was an opportunity for dash and daring, but dash and daring were conspicuously absent. The greatest hitters played the timid game, and "there was not a thrill from start to finish." The jibes of American critics at the interminable duluess. as they phrase it, of the great English game. were for once justified; and when we learn that the most pious votaries of the gam . who might have been seen in the morning trooping eagerly along bt John's Wood-road with hampers of lunch and field glasses, actually left, the field, we amost feel as though the knell of cricket had sounded.

It yet remains for the two elevens to efface the contumely which their too can ious tactics have brought upon the game. They have their chance to day and to morrow. If they fail to rise to it, who knows but that a journey to St. John's Wood will become the regular recipe for shattered nerves and exhausted physique, and that in place of the importance of a match being gauged by the loudness of the cheers, its medical value will be as ayed by the heaviness of the storing which arises from the slumbering occupants of the pavilions?

#### THE "RENOWN" AND THE ROYAL VISIT TO INDIA.

The Renown, battleship, refitting in Portsmonth Dockyard in preparation for conveying the Prince and Princess of Wales to India, is to be out of the Dockyard hands by Sept mber 2nd. She will be completed to full complement on September 1st, and in addition to apt. the Hon. Hugh Tyrwbitt, who will be in command, and who, it is expected, will hold the t mporary rank of commodore, Capt. T. D. L. Sheppard, assistant to the captain of Devouport Dockyard, will be borne for navigating duties.

It is poderstood that the Prince of Wales and suite will embark at Portsmouth during the first week in October, when the Renows, accompanied by the Terrible, cruiser, will leave for Genes, where the Princess of Wales will join entrance to the Hongkong Helel) the Royal purty.

# OINTMENT

**Emollients** and Greatest of Skin Cures.

The Most Wonderful Curative of All Time

Torturing, Disfiguring Skin Humours

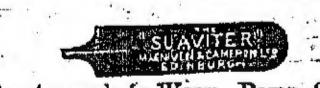

#### And Purest and Sweetest of Tollet Emollients.

Cuttours Cintment is beyond question the most successful curative for torturing, disfiguring humours of the skin and scalp, including loss of hair, ever compounded, in proof of which a single anointing preceded by a hot bath with Cuticurs Soap, and followed in the severer cases, by a dose of Cuticurs Resolvent, is often sufficient to afford immediate relief in the most distressing forms of itching, burning and scaly humours, permit rest and sleep, and point to a speedy cure when all other remedies fail. It is especially, so in the treatment of infants and chilf dren, cleansing, soothing and healing the most distressing of infantile bumours, and preserving, purifying and beautifying the skip, scald and hair. Cutlcura Cintment possesses, at the same time, the charm of satisfying the simple wants of the toilet, in caring for the skin, scalp, hair, hands and feet, from infancy to age, far more effectually, agreeably and economically than the most expensive of tollet emollients. Its "Instant relief for skin-tortured babies," or "Sanative, antiseptic cleansing," or "One-night treatment of the hands or feet," or "Single treatment of the hair," or "Use after athletics." cycling, golf, tennis, riding, sparring, or any sport, each in consection with the use of Cuticura Soap, is sufficient evidence of this.

Corderes Resolvent, liquid and in the form of Chocolate Coated Fills, Carloura Cintracot and Cuticuta Scap are sold throughout the world. ANOTHER DEBT TO COAL TAR -A NEW BREAK-WATER-DANGER FROM COLLARS-THE DOUBLE MICROSCOPE-GREED FOR OIL-A NEW MATERIAL-CATPHOBIA-HEAT WASTE IN COOKING-FLICKER AND GLOW IN LIGHTNING.

Advenulin which has made bloodless surgery large es marbles. The properties of the secreactive principle, and this was at last isolated in 1901 by Dr. J. Fakamine, the Japanese chemist. The discovery has proven of extraordinary import noe. Adrenalin is a powerful astringent, and drives the blood away from any living surface; it is especially usoful in delicate surgery upon the ness and throat, but it stops dangerous hemorrhages, relieves congestion of the eyes, and is the most powerful heart stimulant known. As prepared by a long and delicate process from the glands of the sheep, it is costly. method of cheapening it would be a boon to humanity, and the making of it from coal tar as announced by Dr. D. Dakin, is of correspond: ing interest.

The floating breakwater under test at Torquay is a timber frame sinking to a depth of 40 feet and supported at the land end pontoons, the structure being thus tilted toward the s a. The frame is moored on both sides by long chain. As storms have little effect below a depth of 12 or 15 feet, it is believed that the structure will effectually break the force of the sea, and experience with buoys and pontoons gives confidence that the chains will held.

The pressure of a stiff high collar on the pneumogastric nerve has been found by Dr. or odor. F. B. Brubaker to produce appleasant symptoms like numbress, nauses, lassitude and depression of spirits. He believes that prolonged pressure by a close-fifting colar would tend to serious. disease, such as lung disease.

In the examination of food substances and other materials, microscopists often find it necessary to compare two slides. This soon becomes very tedious by the usual method of substituting one slide for another or using duplicate m'eroscopes, and a laborious study of starches, fibers, etc., has led two Euglish investigators to devise a much simpler process. The new idea is a piece of apparatus known as the Ashe Finlayson comparascope. The second slide is placed upon a hovizontal red attached to the side of the nese-piece of the microscope, and a mirror and lens project the image into the nose-piece, where an inclined reflector deflects the rays up the microscope tube. The tube itself is divided by a removable plate, so that the images of the two slides to be compared appear side by side in the field of

The penguins, of which about a dozen species still exist on the rocky islands and coasts of the southern hemisphere, are of unusual interest as the survivors of the great flightless birds. Human greed has been attracted to these rare creatures, and Dr. E. A. Wilson, an English naturalist, points out that within the last few years thousands of them have been slaughtered for oil on Mucquarie Island and the Aucklands, not less than 100 tons of the oil having been recently placed on the mark t. A new scheme is to establish great oil cauldrons in the Auckand Islands. Thus fer the "rookeries"

these islands have suffered comparatively little from man, but the carrying ont of the new project will bring speedy extinction to one of the most unique life forms of the world.

-Silicon, the most abandant motal in the world has been unknown on account of the difficulty of separating it from oxygen, but the electric furnace has now made it obtainable in quantities possible, is the active principle of the sur rarenal to meet any demand. It is expected to have glands, two imperfectly understood little bodies some importance in iron alloys. It gives to placed over the kidneys and in man about os steel valuable electrical properties, it imparts such hardness as to make some alloys possibly tion of these glands led to a long search for the useful as abrasives, and the compound known as "calorite" serves like thermite for obtaining high temperatures.

> The curious dread of eats that has been studied for three years by Dr. S. Weir Mitchell. of Philadelphia, may open up a wide field for investigation. An advertisement brought 159 roplies from different countries ... including Germany, Egypt and India, and about two thirds of them mentioned cases of fear of cats. This asthma, due to odors may be excited by the presence of horses, dogs, cuts or sheep, or even of roses, apples, oranges or banauns. The catphobia comes instantamentsly, and may be very severe, catalogsy baving developed in one case. and temporary blindness in another. It passes with the going of the cat, leaving a sense of fatigue and depression. It is not confined to women, nor are the men always fimorous, and one army officer who had fearlessly hunted dangerous cats-the lion and the tiger-would

go for out of his way to avoid the domestic cut Families are sometimes affected. Some em unation seems to be the active agent, the cut in many cases being unseen, and it is suggested that aupersonsitive nerves may be affected by waves of the other that do not yield light, how t

The loss of energy in generating electricity and reconverting into heat makes electric heating very costly for most purposes. In electric cooking, however, this waste is offset by a greatly increased efficiency of application. A recent determination shows that only 2 per cent, of the total heat of the ordinary kitchen range is used for cooking the food, 12 per cent. being wasted in obtaining a glowing fire, 70 per cent. going up the chimney, and 16 per cent. heing radiated into the room. A good electric cooker applies 90 per cent, of the liest energy to cooking the food.

The "flick" sometimes noticed in lightning proves to be due to the fact that several flashes -sometimes five or six-follow one path too rapidly to be separated by the eye. The trails shown in photographs of very bright flashes are caused by incandescence produced in the air for a very brief period.

#### INTERNATIONAL MARITIME CONFERENCE AT LIVERPOOL.

The Times of 15th June says :- The International Maritime Conference, which is moeting. in Liverpool this week, under the presidency of Mr. Justice Kennedy, the president for the year, opened yesterday. There was a welcome of the delegates at the Town-hall by the Lord Mayor and the Reception Committee, followed by a reception by the Lord Mayor. Delegates numbering about 60 were present representing the chief maritime nations-England, France Germany, Austria, Hungary, Belgium, Norway, Sweden, Denmark, the United States of America, Japan, Hollandsaud Italy. The object of the conference is to endeavour to bring about the unification of maritime law with regard to collision and salvage cases. Among those present were Sir Alfred Jones, Mr. Austin Taylor, M P., Mr. W. Pickford, K.C. (Recorder of Liverprol), Mr. Beernaart (Belgium), M. Verneaux (Messageries Mariime, Paris), and Justice Brandis (Hamhurg).

The Lord Mayor of L ive pool (Mr. John Lea), addressing the delegates, said their business would not be simply one of legalphrases, but would lead, he trusted; to a great increase of that mutual respectand good will without which no alliance among nations could count for very much. The gentlemen representing foreign natious might in a very large maisure be welcomed as ambassadors of peace. M. Beerga-rt (Belgium), in acknowledging the welcome on behalf of the Belgian delegates. said they had come to work hand-in-hand for the realization of that most excellent idea for which England had been the first to take the initiative the unification of maritime law. It was strings that min should submit oceans, which acknowledged no master but God. to twenty different rules and to formulities of all kinds. This must not be. The ocean must know but one single law applicable to every-

body and over its whole extent. Mr. Justice Kennedy was elected president for the conference, and the foll wing were appeluted vice-presidents, each to represent and vote on b ha f of his own country throughout the conference: - Great Britain, Sir Alfred Jones (Liverpeol); Austria, M. Ebner Trieste); Relgium, M. Le Jeune (Autwerp); Denmark, Mr. Chr. Hvidt: Germany, Mr. Justice Brandis (Hamburg): Hungary, Dr. Benyovits (Finne), Italy, Professor Berlinghieri; Japan, Mr. Suketada Ito; Norway, Professor Plat in; Sweden de Gunther. Physepresontatives of the United States and Netherlands were not a decled.

In the evening the delegates were entertained at dinner by the five Liverpool associations forming the reception committee. Sir Alfred Jones presided.

#### JOINT STOCK SHARE:

Messys. Vernon & Smyth say in their weskly share report dated Hongkong, 14th July, 1905. Business during the week has been nearly at a standstill and compassi only of small cish investments. More names have been added to the list of June defaulters, all of whom have found their opportunity under the protection of Kiswick Share Bill, of which they have in many cases tak-n advantage, and it is becoming increasingly apparent that the time has arrived when, for the protection of both the public and the share-brokers. some steps should be taken to end or unend an act under the protection of which any unse upulous broker or speculator may, if he so choses, under present circumstances, escapa from his liability. The object of the Bill has never been even partially attained, and now that the bitter feeling between bulls and bears, which notoriously gare it birth, has happily passed away, there seems to be no good reason why the advisability of repealing a Bill (which hasno counterpart in any part of the world), or of at least limiting its powers to bank stocks, should not be egisidered. It is evident that sanething will have to be done if confidence is to be restored, and a growing ovil checked.

BANKS .- The demand for Hongkong and Shonghais has continued during the week, and with no supply the rate has further boomed to \$890, at which shares have changed hand. The Loudon rate has improved to £38.10 per Reuter. but private advices to day give £90; an interim: dividend of 35s has been announced. Nationals are still enquired for without bringing any shareson the market, and the rate has rise ; to

MARINE INSURANCES .- Unions have continued in demand at \$700 but no business has resulted, and the market closes at 8705. Cantons have also been enquired for, but holders will not part, and only very small sales have been effected. At last the well kept secret is publicproperty, and the China Fraders' cat is out of the bag. (Its a wonder it was not suffocated. perhaps it was). It appears that negotiations have been going on for some months for the absorption of the Company by another local Marine Insurance Co.; the negotiations reached en advanced stage and w ruth a broken off on comparatively minor point, but are again about to be renewed, and the meeting of shareholders of the China Traders has been called for the 17th inst., to further that end. In the mean time the market has fluctuated considerably and after further sales in the early past of the week at \$74 and \$75 the rate suid ofly fell to \$67 and \$68 at which a fair business was transarted. Upon the resumption of negotiations the rate again quickly rose to \$78 with sales after some small sales had been off of d at \$72 and \$73. The market close: with some sellers at 878. Nrth Chinas and Yangtsz:s- remain unchanged and without basiness.

FIRE INSU ANCES. Hougkongs have improved to \$305 and Chigas recoded to \$85, no

SHIPPING. - Hongkong, Canton and Macaos have been placed at the reduced rate of \$164 closing quiet at that. Indu-Juines, in the early part of the week were neg tiated at \$96 but improved later with a Samplai demand, and close at \$93 ex div of \$6 29 paid, in Hongkong yesterday. Other stocks under this heading have been totally neglecte | and clos quiet

REFINERES. Coina Sagara have found buyers at \$212 and \$211 doing fair y steady at the latter rate. Duz as un hang id and without

MINING.—Raubs have improved to 863 with sales. Charbonna os unchanged and neglected. DOCKS, WHAR ES, AND GODOWNS .- WITH the exception of a small unsatisfied demand for Hongkong and Whampon Docks at 8195 we have nothing to repo tunder this heading. Farnhams are quoted Th. 1 lower (Tis. 140)

LANDS, HOTELS AND BUILDINGS .- The small demand for Hongkong Landshascontinued and a few shares have compact hands at 5.17. the market closing with buyers. This Comrany has announced an interim dividend of \$3.5% West Points are obtainable at \$53, the Company has also andomiced an interim dividend (\$2.75 per share). Humphreys have change t bands at \$12½ closing with sellers. Sampled Lan s have advanced to Tis. 12 14 and have anuounced

a div. of Tls. 3 per share. COTTON MILLS.—All the Northern Mills are firmer. Ewes have advanced to \$48, Internationals to \$43. Laou Kung Mows to \$49. Hongkongs remain unchanged and without

MISCELLANEOUS .-- With the exception of an improvement in Bells Asbestos Eastern Agency to -7, and small rales of Watsons at \$121 and Green Is hads at \$261, we have no basiness to report.

Luh-liwa's coiffure was simpler. Her hair was carefully combed until every thread hing straight and unentangled, and than ancinted with a kind of palm-qil. This having been done, it was parted across the crown and combed round the ears, a piece of tape being then tied tightly over the head and fastened beneath the chin to keep the front intact while the back was being done. The loose hair was next gathered in behind, and bound round in two. places, near the head, with god silk cord, and the bushy part twisted until it became almost as stiff as a rope; then, skilfully winding it into loose coils round her hand, the amah pressed the plait into its place, drawing the boundup part through, so that it formed a conchordial loop through which a gold beam, about, in him." four inches long, was passed, tike a 'toggle," and this held the coiffure in position. Finally,

the tape was untied from the head, and replaced in the box, from which a pot and soft brush were taken. INSURES SCALP COMPORT.

During the summer menths the n inute glands of the scalp are called upon to perform an extra amount of labour. The perspiration that exudes in increased quantities must be hardled promptly, as this perspiration is the vehicle for carrying out poisoncus and refuse matter that would otherwise clog up the pores of the scalp, and thus greatly increase its susceptibility to the retention and development of the dandruff microbes. When the scalp is in an unbealthy condition, and especially if the heir follicles are harboring micro-ergorisms, the complete elimination of refuse matter is largely interfered with. This produces that HOT AND FEVERISH CONDITION (F THE SCALP that so many are familiar with, but that so few fully under stand. When the scalp is in this condition the necessity for a safe but active germicide will be apparent to all. Newbro's Herpicide is such a remedy. It dissolves and dissipates the dry and incoluble refuse matter that clogs up the pores of the scalp. It sets as a refrigerant, cooling the feverish condition, and stopping all itching and irritation.
